

A PRODUCT OF AUTOMATED PACKAGING SYSTEMS

The AirPouch™ Express 3 Void-fill System — Versatility, lower shipping costs, and improved productivity in a compact, tabletop unit

The AirPouch Express 3 Tabletop Void-fill System provides on-demand, easy-to-use air pillows for high packing productivity, reduced shipping costs, and increased customer satisfaction.

Operating at speeds over 50 feet per minute in semi- or fully-automatic modes, the AirPouch Express 3 creates continuous strips of air pillows that are ideal for all protective packing applications. Weighing in at just 35 pounds, this compact, all-electric system features operator-friendly controls and virtually maintenance free operation. Simply plug the unit in, load the air pillow material, and start packing.

The AirPouch Express 3 also offers a wide variety of accessories and integrated system configurations for optimum productivity in each unique application. Basic accessories can be added to the Express 3 to create a simple, stand-alone packing station, or the system can be integrated into existing workstations for high-productivity, multi-user fulfillment operations.

AirPouch air pillows feature our unique EZ-Tear™

Perforations that are preferred for their easy handling and effortless pillow separation. AirPouch void-fill material feeds from a high-yield box, reducing changeovers and operator lifting. Material storage space is minimal.

AirPouch void-fill air pillows feature superior seals and puncture resistance for durability and reliable air retention. These lightweight, clear air pillows offer the convenience and cleanliness not found in other void-fill products, such as EPS peanuts or paper. Protected products are easily identified inside the shipping carton, reducing waste and increasing customer satisfaction.

System-matched for optimum performance on the Express 3 system, AirPouch void-fill air pillows are available in a range of lengths, widths and mil gauges to suit any void-fill application requirement.

User Benefits

- Provides easy-to-use air pillows on-demand for fast, easy packing in semi- or fully-automatic modes
- Compact, tabletop system produces air pillow bags at speeds over 50 feet per minute
- EZ-Tear Perforations are packer-friendly and designed for improved efficiency and ergonomics
- All-electric, portable system is lightweight and does not require compressed air
- Easy to install and simple to operate
- Boxed material requires less lifting and fewer changeovers
- Better air retention and improved yield reduce cost per cubic foot
- Dust free, transparent air pillows reduce product loss and are cleaner to use than EPS peanuts
- Lower shipping costs with lightweight pillows compared to paper

Standard Features

- All-electric design does not require compressed air to operate
- Compact and lightweight for portability
- Operator-friendly controls for easy set-up and operation
- Adjustable air volume and run timer
- Reliable equipment requires minimal maintenance

Options

- Machine Stand
- Storage Hoppers
- Automatic Product Level Sensors
- Dispenser Attachments
- Footswitch
- Air Tower Overhead Hopper System
- Custom engineered solutions for unique packing station requirements
