# HS-200 Automatic Wide Bagger

This all-purpose high-speed bagging machine automatically dispenses pre-made Autobag® bags-on-a-roll. The bags are automatically indexed, opened, sealed and detached. Operating speeds are up to 45 bags per minute. This wide bagger is capable of running wide bag applications from 6" X 6" to 16" X 22". State of the art programming also allows for Predetermined Counting and Totalizing Counters. The wide bagger comes standard on a heavy-duty stand with casters.

### Applications

- Hand load Automotive packaging
- Traditional hand load
- Low volume Hardware kits
- Parts requiring inspection and assembly
- Large parts incapable of passing through funnels
- Manuals/instructions

### Industries

- Automotive replacement parts
- Hardware
- Crafts
- Fasteners and connectors
- Appliance parts
- Plumbing/irrigation parts

# HS-200 Automatic Wide Bagger

Operated horizontally, the wide bagger is ideal for difficult hand-load applications

A wide variety of funnels and bag deflators is available

Operated vertically, the wide bagger easily handles loads up to 16 inches wide
