

Shaping up: solutions for every need

Special machines

Notapack
Special design for
wrapping banknotes

It's fine to have a wide range of products. But in practice, we find the best solution can only be found with a machine that is specially designed for the customer.

Since the company was founded in 1965, Kalfass engineers have been committed to solving problems in the field of film packaging. During

this time, we have been able to put many a pioneering achievement on the road with and for our customers.

Our flexible and efficient design department knows the best course to take towards finding a solution for you.

We are ready. Come and tell us your packaging problem.

A view from the inside: about us

Kalfass is a skilled complete provider. We offer a comprehensive range of products designed to meet extremely diverse needs in your day-to-day business. We also see it as our

responsibility to continue offering you support after our machines have been delivered. Along with a telephone support hotline, we have qualified service engineers at our branches to

give you rapid and unbureaucratic support in the use of our products. Moreover, very close contact is maintained with our customers through our strong sales organization

at home and abroad, with authorized distributors in all business centers around the globe. The addresses and contacts of some distributors are provided below.

In good company: reference customers

3 M, USA

Film Packaging Machines

Efficient and Careful Packaging

Allow us to introduce the comprehensive range of Kallfass machines. All our machines fit together like the pieces of a puzzle, to form a systematic whole. Modular and reliable construction and an extensive range of accessories ensure that our machines can still be used

effectively many years into the future. Along with optimum packaging quality, our products fulfill all the criteria that matter these days: they are simple to operate, versatile in use, and extremely economical with resources.

L-Sealers

L-sealers for manual, semi-automatic and fully automatic operation. Film wrapping with centerfolded film. Standard and combined L-sealers with patented electro-mechanical sealing frame mechanism.

Manual L-sealers
Sealing frames from 16" x 16" to 52" x 36", up to 25 cycles/min.

Semi-Automatic L-sealers
combined with shrink tunnel, up to 25 cycles/min.

Fully automatic L-sealers
up to 35 cycles/min.

Side sealers

Fully automatic operation. Complete overwrapping with centerfolded film. For any length of product and for frequent, fast changes. Continuous side sealing unit in various designs. Intermittent or continuous cross sealing system.

Fully automatic side sealers
up to 70 cycles/min.

Large format side sealers
up to 70 cycles/min.

Servo-controlled side sealers
with continuous motion cross sealing system, up to 170 cycles/min.

Sleevewrappers

Sleevewrappers for semi-automatic and fully automatic operation with two rolls or flat film. Sleeve-wrap shipping package with bullseye or completely sealed shipping package with our unique side fusion seal technology (HV*).

*patent pending

Fully automatic sleeve wrappers,
inline or angle infeed,
up to 28 cycles/min.

Fully automatic sleeve wrappers,
inline, up to 50 cycles/min.

Sleevewrappers
for especially large formats.
Sealing width up to 5'.

Shrink tunnels

Energy saving shrink tunnels for presentation and transport packaging. Highly efficient heat insulation of the tunnel hoods. COMPACT models with patented ring nozzle heating system for minimized energy consumption. SO designs with additional insulating hoods for increased shrinking capacity.

Compact shrink tunnels
with extremely small footprint.
Clearance width 16".

Universal shrink tunnels
for a variety of purposes. Clearance
widths from 18" to 38".

Large and special shrink tunnels
also with HV technology. Clearance
widths from 26" to 63".

Components/infeed systems

Lugged infeeds
Modular construction:
Working widths 20" and 32".
