Large Automatic L-Bar Sealer

Technical Specifications:

Model No.: **AS-2530A Auto L-Bar Sealer**

Seal Area: **25" x 30" x 9" High**

Power Requirements: **220 VAC - 11 AMP**

Machine Footprint: **91"L x 67"W x 66"H**

Shipping Weight: **2300 LBS**

Model No.: **AS-2530AC Auto L-Bar Sealer**

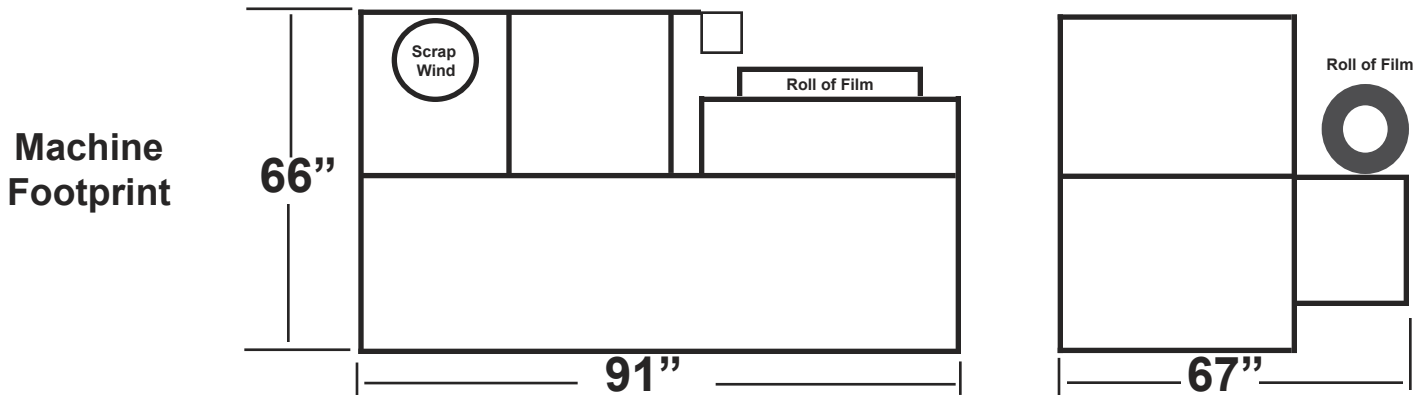

Seal Area: **25" x 30" x 9" High**

Power Requirements: **220 VAC - 11 AMP**

Machine Footprint: **91"L x 67"W x 66"H**

Shipping Weight: **2300 LBS**

Clean & Dry Compressed Air Required on all Models: 80 -100 Lbs. @ 6 CFM

● This large Automatic L-Bar Sealer is the perfect Machine for large Products. The Heavy Duty Sealing Blades are coated with a Hi-Tech durable Anti-Stick Coating to insure long life and strong Seals. **SEAL-A-TRON** is proud to offer "Powder Coating" on all machines, which is the most durable paint finish the industry offers today. The latest Technology PLC with a 6" Color Touch Screen allows absolute control of all machine functions.

● The Product width and Inverting Head adjustments are motorized, and the complete Infeed Assembly can be moved to relieve "Tenting" and Stress on the TD Seal. The SEAL-HEAD moves straight up & down on Linear Bearings guided by Rack & Pinion. These features make it very easy to run large and taller Products. **SEAL-A-TRON** "Know-How" combined with innovative technology have elevated this machine to the next level. A variety of Sealing Inserts are available to run many different films.

DLC-1854
Drop-Lug Conveyor

● Each application is different, and in many situations a separate Infeed Conveyor is needed to properly space your product to eliminate product jams. Some applications are calling for a Drop-Lug Indexing Conveyor, however in most cases a standard Belted Indexing Conveyor will suffice. **SEAL-A-TRON** offers standard self-contained Conveyors, that are controlled by the Automatic Sealer.
