AIRplus® Cushion Film

**NEW FROM
STOROPACK!**

AIRplus® by STOROPack

- Clean and dust-free protection
- Strong and durable
- Reduces shipping costs
- Reusable and recyclable
- Reduces storage space — produced on-demand
- Small footprint with fast output

Padding and Filling With A Single Product

AIRplus® Cushion Film is a cost-efficient packaging solution that can serve two protective functions in the same package — it's strong enough to cushion and protect your products, and it's light-weight enough to serve as void-fill.

AIRplus® Cushion Film — A Universal Packing Material

- Vertical- and cross-seal pattern offers flexible wrapping characteristics
- One 15.75" wide x 1,475' long roll has 28,800 air chambers
- Each 15.75" x 9.84" segment contains 16 air chambers
- Perforated every 9.84 inches to supply 1,800 easy-to-separate cushion segments per roll
- Produced on-demand at the packaging table

AIRplus® Cushion Film can be produced on the Airplus® Excel machine or the AIRplus® Mini machine with the simple addition of a broader roller guide.

AIRplus® Mini machine with a broader roller guide
