

Maxim™ Bulk Ink Systems

Features—

- The low maintenance Maxim™ Bulk Ink Supply system permanently eliminates the need for ink bottles and their inherent problems. A three-liter bulk carton efficiently supplies ink to as many as eight printheads, simultaneously, from one central location - without waste or spills.
- Even during occasional ink carton changes, production remains uninterrupted. Simple disconnect fittings allow workers to change ink cartons while printheads are running, eliminating potential downtime or ink spills.
- With a NEMA 4-rated enclosure, the Maxim™ Bulk Ink Supply system includes a locking cabinet, low ink and error indicators, plus provisions for table top, wall or stand mounting. The system also includes an internal storage slot for an extra three-liter ink container. Maxim™ three-liter ink containers feature ink level view windows for easy monitoring of ink levels.

Technical Data

Hardware

- Air Pressure Requirements None
- Power Requirements 120V/220V, 50-60Hz,
2 amps max
- System Weight 32 lb/14.5 kg
- Case Construction Heavy Gauge Stainless Steel,
NEMA 4 Standard
- Acoustic Noise Less than 45 DBA
- Door Latches: Twist Type, Lockable
- Mounting Options Table Top, Floor Stand, Wall
- Conduit Length 20 ft std., 50 ft max.
- Vertical Distance Up to Six Feet Below Printhead

Operating Environment

	Operating	Storage
• Temperature	40°F to 104°F (4°C to 40°C)	40°F to 104°F (4°C to 40°C)
• % Relative Humidity	10-80%	10-90%

System Control

- Power Switch Side Mounted
- Indicators Power, Low Ink, Error
- Printheads Supported FXJet™ High Resolution Printheads

Ink

- System Capacity 3 Liters
(with storage for an extra 3-liter container)
- Color Black
- Ink Types UltraScan 100™,
UltraScan 200™
