

Stand-Alone Systems

PLS-500

Paragon's PLS-500 series sets a new standard for labeling equipment. With superior features, advanced modularity and easy integration capability, it is sure to meet all of your production needs!

- Allen Bradley PLC controls for easy integration and advanced process control
- Color touch screen interface
- Built in alarm system with audible tone
- Break-away applicator mounts for easy loading & cleaning
- Ability to recall stored label formats making it a truly stand-alone system
- User Defined I/O
- Real time performance statistics
- Multi-level password protection of settings
- Heavy duty plate aluminum construction
- Interchangeable label applicator modules
- Available with ALL OEM engines
- Print speed up to 16"/second with 203 to 609 dpi
- Full 12" label supply roll
- Migration path to RFID

PLS-400 Plus

Paragon's PLS-400 Plus series offers high-quality and cost-effective solutions. The system can be configured to apply preprinted labels or print-and-apply labeling. Because the system is modular, these rugged systems can be configured to label products, cartons, cases, and pallets.

- Allen Bradley PLC controls for advanced integration
- Color Touch Screen Interface
- Heavy duty plate aluminum construction
- Interchangeable preprinted label drive or print modules
- Print speed up to 16"/second with 203 to 609 dpi
- Interchangeable label applicator modules
- Full 12" label supply roll
- Migration path to RFID

PLS-100

Paragon's PLS-100 is the value leader for the application of pre-printed labels. Trust the PLS100 for all of your decorative labeling needs

- PLC controls for advanced integration
- Fast and accurate stepper motor design
- Heavy duty aluminum plate construction
- Label dispensing speeds of 2" to 20" /sec
- Media widths from 1/2" min. to 5" max
- Interchangeable label applicator modules
- Full 14" label supply roll

Standard Turnkey and Custom Solutions

Professional Series

Cabinet based, stainless steel systems for wrap labeling, front/back labeling or both. PLC controlled with touch screen interface. Can be configured as stepper or servo driven. Ideal for pharmaceutical applications and contract packagers.

Open Frame Series

Open frame systems for wrap labeling, front/back labeling or both. PLC controlled with touch screen interface. These stepper drive systems can meet most standard application needs.

Horizontal Wrap Systems

Open frame systems are ideal for wrap labeling of round products such as vials, chap sticks or many other products that cannot be run on a standard wrap labeling system

Table Top Systems

Smaller systems designed to replace hand labeling or semi automatic system. Ideal for start-ups and smaller operations who need to improve labeling speeds

Custom Systems

Let Paragon design a unique systems designed to meet your exact labeling requirements in cases where a standard solution simply won't work.
