single Allen wrench.

Specifications:

For use on 3/4" x .025" to .031"
Magnus® strapping with
34HOC seals.

Tension: Up to 1,600 lbs.

Weight: 16 lbs.

The lightweight PRHM-34 push-type combination tool is designed to secure round or irregular loads with Magnus® strapping in sizes up to 3/4" x .025" to .031". It's ideal for unitizing flat-rolled steel and aluminum coils, wire coils, cut to length steel, angular and other irregular shaped products.

The PRHM-34 is designed to be easier to use and service than other tools in its category.
