

VXT-2

Pneumatic Tension-Weld® Combination Tool for Polyester Strapping

Reliable and durable

All metal and alloy parts provide long-lasting, low-maintenance operation.

Adjustable tension

Tension is easily adjustable without changing the air pressure.

Versatile

Three simple adjustments enable the tool to be used with either 5/8" (16mm) or 3/4" (19mm) strapping.

Easy to operate and service

Front strap guide assures quick, easy loading and accurate strap alignment.

Made in the U.S.A.

Specifications:

For use on 5/8" (16mm) and 3/4" (19 mm)

High-Strength Tenax® polyester strapping.

Tension: Up to 800 lbs.

Base length: 5"

Weight: 8.8 lbs.

The VXT-2 pneumatic sealless combination tool is designed for 5/8" (16 mm) or 3/4" (19 mm) high-strength polyester strapping. This versatile tool can be used on many traditional applications in industries such as lumber, fibers and metals. Compared to other tools in its category, the VXT-2 is lighter and more durable.
